

What is OnionSTAT?

OnionSTAT is an online information collection and management system that has been customized for the Australian onion industry. In the future it will hold a broad range of information to assist industry participants in their business operations. At this time, the focus of OnionSTAT is on the collection of monthly planting, forecast and production data from grower/ packers in the major production regions.

Grower/ packers are requested to enter their data into the form on the back of this letter. This data will then be aggregated and a monthly industry report showing the plantings, forecasts and production and types of onions is produced for use by those that are contributing. It is important to have as many grower/ packers contributing data as possible so that the figures reflect what is happening in the market as accurately as possible.

For this system to work we require the following details:

Trading name: _____

ABN: _____

Contact name: _____

Region: _____

Business address: _____

Postal address: _____

Phone: _____

Fax: _____

Mobile: _____

Email: _____

If you require any assistance determining what data is required, or would like further information on the intent, business rules and terms and conditions related to the use of OnionSTAT, please do not hesitate to call the office on 08 8725 8862 (if the phone is unattended please leave a message and we will return your call)
